

**This complaint is filed firmly against proceeding 17-108.**

This public complaint serves as one of many platforms which I, and many others, have taken to in order to express unwavering resistance to the proceedings meant to repeal Net Neutrality legislation.

Net Neutrality is the corner stone of free information, innovation, and American livelihood. The gravity of the decision in the FCC's hand cannot be overstated. Currently, I believe that the organization is poised to make a horrendous mistake that will take years to undo. Please, do not be the ones responsible for destroying the possibilities of a free and open internet in this country. I believe the decision to repeal Net Neutrality would absolutely damage the country's GDP and GNP, stunt small business growth, stifle innovation, and disproportionately affect individuals while benefiting huge corporations.

It is not the FCC's job to get in bed with Internet Service Providers. It is the FCC's job to regulate them and give voice to the People.

**Stand up. Show leadership. Vote Against Proceeding 17-108.**
